

ICOM Kyoto 2019 Post-Conference Tour in Tokyo
“City Museums as Cultural Hubs – Past, Present and Future”
-Rethinking the relationship between the city and the city museum-

This tour aims to bring together a diverse range of viewpoints on city museums; stakeholders including city museum professionals, curators, researchers, academics, city governance, students, NGOs and anyone interested in the relationship between a city and its museum will benefit from this opportunity to connect and to see the different faces of Tokyo and its museums, and ask:

- What are the issues a city museum faces? What are the solutions?
- What are our definitions of a city museum?

Any big city like Tokyo has many different faces dependent on many factors, including when and where you visit - and the city has many city museums. The tour will be divided into 2 groups so participants can choose to see Tokyo and its city museums from different points of view, before regrouping to discuss their findings. This post conference tour will be carried out on day one of the tour and the second day will be a museum visit.

First Day of Tour

After arriving at Tokyo Station, participants will be divided into two groups, east and west, to see the different regions and museums in the city of Tokyo. In the evening, all participants will meet in Ueno and enjoy a reception we're calling “ICOM-CAMOC Café” to discuss what they discovered during their tours.

East Tour- Bringing participants to see the Edo Tokyo Museum which is located in one of the oldest Tokyo districts (Edo) and to the museums in Ueno Park to experience the first *cultural cluster* in Japan.

West Tour- Bringing participants to visit cultural sites in an interesting residential area (Western Tokyo, Tama area), then heading into Tokyo Metropolitan Area and the *cultural cluster* Art Triangle Roppongi newly created in the 2000s.

Second Day

Museum visit to Tokyo Metropolitan Art Museum
