

## **CIDOC Working Group Digital Preservation – Report 2015**

The WG met twice during the last CIDOC conference in Dresden in September 2014. A definition of digital preservation was drafted likewise a workflow for the process of digital preservation. In the end of September 2014 an Email-list for the internal communication was established and at the beginning of 2015 two new members were welcomed to the working group. In October 2014 the working group was invited to comment on DCH-RP road map. In July 2015 the chair or the working group took part in a meeting of UNESCO's PERSIST working group in Cape Town during the IFLA conference. At this meeting a draft of "Guidelines for the selection of digital content for long-term digital preservation" was presented and the WG chair commented the guidelines on behalf of the museums as a representative of ICOM. In a wider discussion of experts the CIDOC WG Digital Preservation is now invited to give further advice how the guidelines should be formed to fit even for museums.
