

2019 ICR Annual Conference in Kyoto GENERAL INFORMATION & PROGRAMME

GENERAL INFORMATION

2019 ICR Annual Conference in Kyoto

Theme of 2019 ICR Annual Conference:

Regional museums encouraging sustainable use of cultural and natural heritage

Purpose of 2019 ICR Annual Conference:

Regional museums strive to serve their regional/local communities. How can regional museums be active as responsible partners in respecting, preserving and interpreting traditions of cultural and natural heritage? Regional museums can be responsive and collaborate with experts across different fields, collecting both intangible and tangible heritage - to represent people whose voices have not always been heard, especially in preserving customs and traditional practices related to natural resources. Regional museums should expand the field of museum studies to cover ecological issues of the past, present and future, building on traditions of planting, harvesting, fishing, animal husbandry etc. and effective management of the cultural and/or natural environment for a sustainable future.

Keywords of 2019 ICR Annual Conference:

Ecology
Regional museums
Local communities
Museum definition
Sustainability
